Abstract (en)

[origin: EP0959114A1] Vinyl ester-ethylene copolymers with reduced surface stickiness are obtained by radical polymerization of 50-95 mol% vinyl ester(s) and 5-50 mol% of a mixture of ethylene and propylene in a mol ratio of 2/1-5/1, to give copolymers with a glass transition temperature of -15 to +15 degrees C.
