Abstract (en)

[origin: WO9726811A1] A device for the rear (2) of a seat back in a row of seats, e.g., seats in an aeroplane, train, boat, bus, or auditorium, where the seats are placed in rows one after another, where the rear (2) of the seat back (1) has an upper portion (3) and a lower portion, and where the upper portion (3) optionally has, for the use of a seat occupant in the seat located immediately therebehind, a section (9) provided with, e.g., decoration, information, commercial advertising and/or means for visual entertainment. Said upper portion (3) is constructed having a means for releasable suspension of and engagement with a storage body (6), e.g., a carton or box, case or the like, designed for storing articles, consumer goods or the like.
