Abstract (en)
[origin: WO9743995A1] An isolation unit (1) for use with somatic health care, comprising a framework (2-6), a bottom (7), windows (8-10), and a control unit (14). The framework comprises inflatable channels (2-6) which makes the construction totally self-supporting. The windows (8-10) are formed by sections between the channels (2-6). At least one tube (11, 12, 22) is situated in the isolation unit (1) for the supply and circulation of gas mixtures from the control unit (14). The isolation unit (1) has a modular structure, as the tubes (11, 12) are provided for connecting to the corresponding tubes (11, 12) of another module.
