Abstract (en)

[origin: WO9726959A1] Sports footwear such as a boot comprising a rigid base (2) and an upper (3), and engageable with a ski or the like (6) on which the boot is to be supported and retained, while also enabling walking under favourable conditions. The boot is provided with a walking sole and comprises bearing surfaces (12, 13) recessed into the rigid base relative to the sole surface. The bearing surfaces (12, 13) are engageable, directly or via a cradle (7), with the top surfaces of projections (16, 17) on the ski, whereby the boot/ski and boot/ground interfaces are separate.
