Abstract (en)

[origin: DE19706895A1] The invention relates to a processing system for compressed air (1) made up of individual units (2 to 6), such as a filter unit (3), a control unit (4), an oiler unit (6) and/or the like. Said units (2 to 6) are connected to each other by means of a system bus (8). The invention also provides for an interface (9) by which the system bus (8) can be coupled to a field bus (10), which can in turn be connected to a control device (11).
