Abstract (en)

The container consists of a base (2) with a recess (3) for the product (P) and a hinged lid (4) in two sections (10, 12). One section (12) of the lid is hinged directly to the base, while the other is formed by the handle (10) of the applicator, the tip (8) of which fits into a cavity (26) in the edge of the hinged section. The lid snaps shut by means of lip (18) on the end of the handle engaging with a slot in a flexible portion (16) of the base.
