Abstract (en)

The baby carrier consists of a molded body shell (10) with a hinged sun hood (11), and has a T-shaped retaining bar (2). The upright member (2a) of the bar is fitted with an adjustable seat (3), while its cross-member (2b) is connected to the sides of the body shell and has couplings (4) for folding supporting legs (5). The T-bar acts as a support for shoulder straps, and the inside of the body shell has a head rest (10b) and foot rest (10c), the latter formed by a container (10d) for accessories.
