Abstract (en)
[origin: EP0960592A2] The fixed partition elements (7,9,10) each have a wider arm (7a,9a,10a) and a narrower arm (7b,9b,10b) connected at an angle. The wider arms are fixable on the room walls (1,2) and cover these from the shower area. A swivel door element (12,13) is hung from the free end of the narrower arm of at least one partition. The door element can be curved or angled by an obtuse angle of about 135 degrees. The narrower arm and wider arm of the fixed partition elements are connected together integral.
