Abstract (en)

[origin: EP0960997A2] The linkage for the movement of a curved window, in a window or door, has a connecting piece (1) of a bend-resistant material, in a curve over its whole length. It is located under the drive rod (13) in a free zone (9) of the fitting groove (8). It has a cross section slightly smaller than the cross section of the free zone (9) of the fitting groove (8). The curvature of the connecting piece (1) has a radius (10) matching the fitting groove (8) of a curved window. The connecting piece is of plastics or metal.
