Abstract (en)  
The modular assembly groups can be joined to one another by a screw connection. The function units incorporate one or more of the following modules: gear module (10), serving module (20), hand operation module (30), brake module (40), matching module (50) and drive module (60). The hand operation module (30) for manual operation has a chain (32) or crank. The crank is connected with the hand operation module by means of a Cardan joint. The hand operation module is so arranged that it is connectable with the gear module or the serving module. The matching module (50) is so formed that it is connectable with the drive unit and the hand operation module.

Abstract (de)  
Die Erfindung betrifft einen unterschiedliche Funktionseinheiten umfassenden Torantrieb, insbesondere für Industrietore. Erfindungsgemäß sind die Funktionseinheiten als modular aufgebaute Baugruppen (10,20,30,40,50,60) ausgeführt, die wenigstens teilweise lösbar miteinander verbindbar sind. <IMAGE>
