Abstract (en)

[origin: US6698599B1] A device for displaying flat and flexible objects. The device displays flat and flexible objects and is specially suitable for modular display systems, e.g. display racks or display consoles. Flat and specially non-rigid display goods are held upright, and can be reliably inserted and withdrawn. The bottom, the rear wall and the sidewalls are configured as a single-pieced plastic injection molded part. At least one of the sidewalls is flexibly configured at least in one of its segments as a clamp holding the inserted objects in an upright position.
