Abstract (en)

[origin: WO9838593A1] The invention relates to a container identification system for a side-loading refuse collection vehicle comprising a receiving and tipping device and a charging hole for emptying a container (12) in a mounting on said refuse collection vehicle, wherein data stored in a transponder which is located on the container (12) is detected, and the container identification system (10) is provided with a transceiver-receiver comprising an antenna arrangement (10) and with an actuating device (6) for the antenna arrangement, wherein said antenna arrangement (10) can be moved by the actuating device (6) into the detection area of the transponder which is located on the container (12).
