Abstract (en)

[origin: EP0963039A1] The power radio frequency (RF) power amplifier (Rpa) has an input (Irf) that receives RF signals. A supply voltage stabilizer (STB) provides a variable supply voltage (13) to the amplifier. The stabilizer receives and utilizes a reference voltage (Vcon) in order to ensure that the optimum amplifier conditions are achieved. An Independent claim is also included for a mobile telephone transmitter/receiver.
