Abstract (en)
[origin: WO9837969A1] The invention relates to a method and a device for charging and operating an installation such as a hammer crusher to crush recyclable waste materials, wherein said waste materials (4) are drawn in by at least one driven roller (2, 6), they are fed for crushing in substantially homogeneous quantities, and data is collected during the charging and crushing process in order to obtain and regulate operating parameters for the feeding of waste material and for an optimized energy consumption and operational crushing process.
