Abstract (en)

A page attachment and/or reinforcement device comprises a laminate strip 100 comprising a first and second sheets of material releasably stuck together in register by a layer of adhesive, the second sheet being peelable from the first sheet to leave the adhesive on the first sheet. A plurality of holes 140 are formed in the strip along one edge 101, and a respective slit 150, 151 or 152 extends from each hole 140 to an edge of the strip.
