Abstract (en)

Safety plug assembly consisting of a normal stopper (1,2) screwed on the pourout of the container bottle (4) and a safety cap (11), the plug (1,2) and cap (11) being separate elements , of which the plug (1,2) closes all containers (4) whether or not they are containing harmless or poisonous or noxious products, whereas the cap (11) is connected to it by simple axial coupling and is blocked by swells on the plug (1,2) only if the vessel contains noxious or poisonous products, thus transforming the normal plug automatically into a "childproof" safety cap. <IMAGE>
