Abstract (en)

[origin: EP0964049A2] Coke transfer machine (10) runs on several tracks (11A,11B,11C). The running gears (13A,13B,13C) of the machine (10) arranged in the tracks (11A,11B,11C) individually, are fixed via height adjusting devices (21) in relation to the supporting frame work (14) of the coke transfer machine (10). There are geometrical relations between the tracks (11A,11B,11C) and the individual coke oven chambers. Independent claims are included for (i) control apparatus for operating the height adjusting device (21) of a coke transfer machine (10); and (ii) a process to fix the running gear of the coke transfer machine to the coke withdrawal side of the coke oven battery.
