Abstract (en)
[origin: US6287512B1] A frame for supporting structural components of a blast furnace includes a bottom section connected to a foundation, a middle section and a top structure arranged above the furnace top, wherein the frame is manufactured as a latticework construction and/or framework construction and extends in four planes. The bottom section of the frame is provided in the four planes thereof with support members which extend toward each other and meet each other in a base point.
