Abstract (en)

[origin: EP0964119A1] The lock has a contact (1) detecting whether the door is opened and two contacts (2,3), which enable or disable the lock. The lock handle (4) has three cams (5-7) operating two contacts. The second contact (3) can be operated only when the lock handle is displaced in one sense, and both contacts operated only when the lock handle is displaced in the other sense.
