Abstract (en)
[origin: EP0964121A1] The arrangement has at least one holding element for mounting on movable or fixed window or door frames (4,5) and a counter element (11,18) on a fixed or movable frame that engage the holding element in the closed position. When force is applied the holding element and counter element move wrt. each other, deforming the alarm sensor , pref. irreversibly. The direction of response of the sensor is in a plane parallel or approximately parallel to the plane of the window.
