Abstract (en)

The slider consists of a block (3) shaped to fit on a guide rail (4) and be driven by a cable. The block is fastened to the window (2) by an elastic connector (6) inserted in a hole (7) in the window and fixed in place by a locking pin (8). The connector is located on a side lug (9) on the block and the locking pin (8) or, in a variant, a screw (17) is fitted from the inside of the vehicle so that it cannot be undone from the outside.
