Abstract (en)

[origin: EP0964128A2] A mitre connection with mini-tines (4a) on the corresponding glue surfaces is provided on the frame sections (A,B) which are angled and are to be connected together along the side where the faces have the same width. On the side where the faces of the same frame sections have different width a slot and stud connection (3a,3b) is provided. The slot and stud connection is dimensioned so that it corresponds at least in part to the stops provided on the frame sections.
