Abstract (en)

[origin: EP0964408A1] Cable for transmitting information comprises conductors, or pairs (10-16) or group of four conductors, isolated with respect to one another to limit crosstalk between conductors. It comprises at least two longitudinal compliant tapes (22,24) with a metallic coat separating the pair or the group of four conductors, the tapes are applied around each group of conductor by twisting the cable. An Independent claim is also included for a process for manufacturing the above cable.
