Abstract (en)

[origin: WO9839156A1] Mouldings suitable for building refrigerators have an inner and an outer covering layer, as well as an intermediate core which consists to a large extent of an open-pore polyurethane hard foam. The covering layers are pressed by the outer atmospheric pressure against the hard foam core but do not adhere to the core. Also disclosed are a process for manufacturing these mouldings and refrigerators which contain at least one of said mouldings.
