Abstract (en)
[origin: WO9839194A1] The invention relates to a buffer for railway wagons which has an impact bushing (8) positioned inside the buffer plunger (1) in such a way that it slides, opposite the buffer plate (2). Said impact bushing (8) has a projection (9) which adjoins the impact surface (14) of said buffer plunger (1) in its outer position. Said impact bushing (8) is positioned with its rear side adjacent to the impact plate (28) located in the buffer axis. A stopping seat (25) is configured in said impact bushing (8) in such a way that a stopping projection (24) of the buffer is located opposite said stopping seat (25) when the buffer is in the out position.
