Abstract (en)

[origin: DE19706951A1] The invention relates to a drive device for a side ventilator window (1) of a motor vehicle, comprising an actuating drive (8) which actuates an operating lever (4) via a transmission element. Said operating lever (4) is fastened with one end to the side ventilator window (1) and with the other end is firmly attached to the car body. According to the invention, a reducing gear is mounted in the region of the operating lever (4).
