Abstract (en)  
[origin: FR2760272A1] The invention concerns an installation for processing food products, comprising an apparatus for cooling food products by placing them in the presence of a cryogenic fluid, the installation further comprising means (20) for sensing said products (P) processed by said apparatus (10), said means (20) being adapted to determine a value representing the quality and/or the quantity of products processed by said apparatus, the installation further comprising, connected to said data processing unit (23), means for measuring the amount of cryogenic fluid in which the products are placed, and the data processing unit (23) comprises means (24) for computing the temperature of each product (P) coming out of the apparatus (10).
