Abstract (en)

[origin: WO9845965A1] The present invention relates to delivery a local-area information such as cultural activities, educational activities, public notice, etc., providing a local-area information receiver and an overall local-area information offering system based on the receiver. The local-area information offering system stores a variety of local-area information received from various local-area information providers. The transmission are tagged with corresponding local-area identification code; to the receivers, making it possible for the receiver to receive selectively and save only local-area information about the local area where the receiver is located or where the receiver is being carried by a user. It also retrieves information about the local area at any time a user wishes.
