Abstract (en)
[origin: EP0965320A2] The hospital or nursing home bed has an outer frame (1), a back/head part (RKT), a centre part (MT), a thigh-part (OT), and a shank-part (UT). The back/head part (RKT), consisting of metal frame, covered with wire mesh, is fixed to rotating axis (7), running along the centre (MT), and can be adjusted in height. Thigh part (OT) and shank part (UT), also consisting of metal frame covered with wire mesh, can be adjusted in height individually according to needs of patient. The centre part (LR) is made of flexible transverse wooden laths (4) whose supporting strength can be controlled by a specific device (5).
