Abstract (en)
[origin: EP0965366A1] A golf putter (10) is provided. The golf putter (10) comprises a head (11) including a cavity (16). An insert member (17) is supported within the cavity (16) by means of Neoprene resilient O-rings (22,23) and a shaft (14) or a hosel member (13) is connected to the insert (17). Because the insert member (17) is insulated from the head by the resilient O-rings less impact energy is dissipated within the head. The insert member (17) is arranged to be at the sweet spot of the head (11) <IMAGE>
