Abstract (en)

[origin: EP0965676A1] The weight (1) is fastened to the clips (9) via a row of corresponding notches (10) in the periphery and the free front surface (4) of the weight (1) by means of prismatic bodies and screws (13). The counterweight (1) takes the form of a circumferential rim with a quadrangular cross section and is made of concrete. It is positioned round the front loading door on a row of fastening clips (9) arranged round the washing solution container (2).
