Abstract (en)

[origin: EP0965803A2] A connection device for a heater, esp. a plate heater in a warm water heating installation, comprises a lower connection, a riser tube, and an upper valve housing region on the heater inlet. The riser tube (11), the lower connection (13) and the valve housing (17) are produced from a single tube made of deformable metal. The lower connection area pref. has an adaptor with a teflon sealing ring on its inner thread.
