Abstract (en)

[origin: DE19710907A1] The invention relates to the use of ascorbic acid or one of its salts to produce a medicament which is suitable for parenteral application, contains more than 5 g ascorbic acid or one of its salts and is used as an adjuvant in the treatment of malignant tumors using chemo- or radiotherapy. The invention also includes a combined preparation comprising a) a ready to use medicament which contains ascorbic acid or one of its salts and which is suitable for parenteral application and b) a ready to use medicament which contains a chemotherapeutically active cytostatic agent which is suitable for parenteral application, provided separately in one packaging unit. Said medicaments a) and b) are used in the treatment of malignant tumors using chemo- or radiotherapy and can be administered at the same time, separately or at set intervals as desired.
