Abstract (en)
[origin: WO9839072A1] The invention concerns a snowshoe (1) in the shape of a plate comprising an assembly of walls constituting the strings, designed to rest on the snow and support the user's boot and a fixing element such as a plate (9) pivoting about a transverse axis (XX') for maintaining the user's boot, characterised in that between the plate and the snowshoe damping means are provided.
