Abstract (en)
[origin: US6438902B1] The present invention relates to an easily erected small cabin, in particular a toilet cabin, which is provided with a floor part (1), a ceiling part (2), a wall element (3) and corner posts (4) connecting together the wall elements, floor part and ceiling part, and wherein all the parts described hereinabove are manufactured from plastics. In order to provide an easily erected cabin of the type described in the introduction, which is manufactured almost completely from plastics, and nevertheless has strong mechanical cohesion, it is proposed according to the invention that either on the posts on the one hand and the floor part and ceiling part on the other hand, and/or on the wall elements on the one hand and floor and ceiling part on the other hand, and/or on the wall elements on the one hand and the posts on the other hand, alternately overlapping connecting elements (5, 6, 7) are provided which have bores (11, 15) which, when the relevant parts are assembled, line up with one another, and through which locking bolts (9) extend which ensure the cohesion of the parts connected together.
