Abstract (en)

[origin: WO9841055A2] The invention relates to a loudspeaker with a cone (2) and beading (4) connected thereto (2). Said beading consists of a sprayable plastic layer which is soft in a solid state. An open negative mould (16) is used in the method to produce the inventive loudspeaker, said cone (2) being arranged therein and secured thereto. Plastic is then sprayed into the open negative mould (16). The beading (4) is shaped in the form of a plastic layer and is joined to the cone (2).
