Abstract (en)  
[origin: US6209439B1] A garlic cutter having a housing and a beaker shaped structure adapted to receive garlic rotatably disposed in the housing. The beaker shaped structure has a cutting grid for cutting garlic or other vegetables. An upper part, bearing a punch, threadingly engages the housing such that when rotated the punch is urged towards the cutting grid pushing the garlic through the cutting grid. Preferably, the punch and cutting grid are rotated in unison upon rotation of the upper part to allow a plurality of pegs of the punch to align with and enter corresponding apertures in the cutting grid. A cutting blade is non-rotatably disposed beneath the beaker shaped structure to cut garlic emerging from the cutting grid.
