Abstract (en)

[origin: EP0967452A2] A single cleaning component (105) is successively pushed into the flue gas ducts (106) and is movable via an adjustment mechanism (101, 118) crossways to the longitudinal direction of the flue gas ducts. The adjustment mechanism has a guide (104) for the cleaning component, which is positionable in an axial direction in front of the flue gas ducts.
