Abstract (en)

[origin: DE19714174A1] The invention relates to an air bag module, specially a passenger air bag module, with a folded gas bag, wherein the air bag module comprises a gas generator with a diffuser which extends eccentrically in relation to the gas generator in the direction of the passenger to be protected. The folds are located on one side of the diffuser. According to the invention, the one-layer folds (10-20) are placed perpendicular to the diffuser (6) and transversally in relation to the passenger.
