Abstract (en)
[origin: WO9840284A1] A container having a hollow body portion (2) closed by a cap portion (6) has a tamper evident closure thereon which comprises at least one plug (12) carried by one of the body portion (2) and the cap portion (6) and which, with the cap portion (6) in a closed position on the body portion (2), is located in, to be a tight friction fit in, a corresponding recess (10) formed in the other of the body portion (2) and the cap portion (6), a region of weakness (18) being provided between the plug (12) and the component on which it is mounted, the arrangement being such that, on movement of the cap portion (6) from its closed position on the body portion (2), said region of weakness (18) is broken whereby, on return of the cap portion (6) to its closed position, evidence of tampering is immediately visually apparent.
