Abstract (en)  
[origin: WO9839425A2] The present invention describes a new shuttle vector permitting the expression of engineered toxin mutants and toxin fusion proteins in *Corynebacterium*. In addition the invention provides a mutant *Pichia pastoris*, a method for producing this mutant and a method of expressing engineered toxin mutants and toxin fusion proteins in the mutant form of *Pichia pastoris*. The invention further provides a mutant Chinese hamster ovary (CHO) cell, a mutant insect cell, a method for producing these mutants and a method of expressing engineered toxin mutants and toxin fusion proteins in the mutant cells.
