Abstract (en)
[origin: DE19711227A1] The invention relates to a plate-type mounting base (2) for detachably mounting a valve unit (3). Said valve unit (3) comprises several valve modules (4). Said mounting base (2) has a modular construction and contains a plurality of individual base segments (23) which are joined to form a rigid unit. Several connecting segments (25) which correspond to said valve modules (4) are located beneath said base segments (23). Said connecting segments contain consumption channels (33) which communicate with said valve modules (4), an electrical and/or fluidic functional unit (38) being allocated at least partly to said consumption channels.
