Abstract (en)

[origin: WO9922347A1] The invention concerns an automatic dispenser of fresh cut flowers making bouquets on request, consisting of an apparatus (1) comprising a storing and preserving structure capable of housing a series of various fresh cut flowers (3) and arranged such that at least one flower of each series can be seen from outside, an external control mechanism (4) associated with a coin operated meter (5) for selecting said flowers individually and conveying them towards a unit packaging the constituted bouquet in extensible individual packages using a transparent film roll. The apparatus is designed to be installed in public places such as a railway concourse, airports, hospitals and the like, or in the proximity of a florist's shop for extending sale after opening hours.
