Abstract (en)

[origin: US6316713B1] A sound pickup switching apparatus for a string instrument having a plurality of sound pickups, in particular for an electric guitar. The apparatus includes an operable switching device which is intended to connect the coils of the sound pickups in different combinations in order to produce an output signal of different tonality. A voice signal production apparatus, depending on the respective state of the switching device, produces a voice signal designating the state. The string instrument includes a voice signal production apparatus which makes it possible to output states of the string instrument by voice.
