Abstract (en)
[origin: WO9842049A1] The present invention provides a lamp socket which can easily be connected to a discharge lamp, and which has a high degree of safety. Lamp socket (10) includes first and second housings (20, 50) which are fastened together so that the housings clamp a plurality of wires (41a, 41b, 42, 43) of a shielded cable, and electrical terminals (31a, 31b, 32, 33) which are connected to the wires. The first and second housings (20, 50) have main body sections (27, 57) which support the terminals, and extension sections (28, 58) which protrude from the main body sections (27, 57) and along which and from which the wires extend. Shielding conductor (8) of the shielded cable is fastened to outside surfaces (23, 53) of the extension sections (28, 58).
