Abstract (en)

A hinged-connection device is provided, in particular for cabinet doors, comprising at least two swinging rods (2, 3) and two attachment sets (6, 7) to be connected with a cabinet door (4) and a cabinet post (5), respectively. At least one of the attachment sets (6, 7) is provided with a positioning element (11) of circular profile (11a) and a bearing body (15) to be fastened to a plurality of operating positions relative to the positioning element (11). The bearing body (15) is shiftable relative to the positioning element (11) in the door or post plane along a substantially horizontal movement axis (16). <IMAGE>
