Abstract (en)

[origin: EP0969420A2] The method involves preparing new postal rate table data (210) in data center, forming request data, communication (120) from the terminal involving transmitting request data to the data center requesting the new service data, receiving and storing the data. The method involves preparing new service data in a data center for future processing based on the data; forming request data for the service data; a first communication (120) from the terminal involving transmitting request data to the data center requesting the new service data, receiving and storing the data; a first communication (220) from the data center involving receiving the request data and transmitting the requested service data; a second communication (130) from terminal involving forming and transmitting data related to the valid service data to the data center; and a second communication (230) from the data center involving receiving and checking the further data and sending an OK signal to trigger registration of the service. An Independent claim is also included for an arrangement for implementing the method.
