Abstract (en)  
[origin: FR2759272A1] The invention concerns a bottle support and a panel equipped with such supports. The support comprises a bearing surface (5) with one end (7), distant from a stop surface (4), located in the dihedral angle (A) formed by the vertical plane passing through the centre of gravity (G) of the bottle (B) lying on the support and the plane (Q) orthogonal to the longitudinal axis (X-X') of the bottle (B) and passing through the centre of gravity (G). This support is for maintaining a bottle, such as a magnum, in an inclined position of stable equilibrium.
