Abstract (en)
[origin: WO9842548A1] The invention relates to a side impact protection device for vehicle occupants, comprising a curtain-like gas bag (31) which when inflated at least partially covers on side window of a vehicle, as well as at least one fastening device (41), via which the gas bag (31) is fixed to the vehicle frame (35, 37, 39). The invention is characterized in that the cut of the gas bag (31) and the position and nature of the fastening device (41) are adapted to each other in such a way that the inflated gas bag (31) essentially does not cause any force to pass via the fastening device (41) to the vehicle frame (35, 37, 39) until the occupant impacts the gas bag.
