Abstract (en)
[origin: WO9832881A1] The invention relates to a tap hole drill with a carrier structure (14), a drill mounting (10) and a suspension arrangement (12). The drill mounting (10) is fixed to the carrier structure (14) by means of the suspension arrangement (12). The suspension arrangement (12) is designed in such a way that the height and incline of the drill mounting (10) can be adjusted, whereby the height and incline of the drill axis can be adjusted independently of each other.
